The Resting Brain: Unconstrained yet Reliable

Feature Binding in the Feedback Layers of Area V2

Prefrontostriatal Circuitry Regulates Effort-Related Decision Making

The Electrotonic Structure of Pyramidal Neurons Contributing to Prefrontal Cortical Circuits in Macaque Monkeys Is Significantly Altered in Aging

Different Spatial Scales of Shape Similarity Representation in Lateral and Ventral LOC

Glutamatergic Inhibition in Sensory Neocortex

Hemispheric Asymmetry of Auditory Evoked Fields Elicited by Spectral versus Temporal Stimulus Change

Double Dissociation between Motor and Visual Imagery in the Posterior Parietal Cortex

The Brain’s Intention to Imitate: The Neurobiology of Intentional versus Automatic Imitation

When the Brain Changes Its Mind: Flexibility of Action Selection in Instructed and Free Choices

Overlap and Segregation in Predorsal Premotor Cortex Activations Related to Free Selection of Self-Referenced and Target-Based Finger Movements

Proteomic Analysis Illuminates a Novel Structural Definition of the Claustrum and Insula
DOES YOUR LIBRARY SUBSCRIBE TO THIS JOURNAL?

WOULD YOU LIKE YOUR COLLEAGUES TO HAVE EASY ACCESS TO THIS RESEARCH TOO?

- Recommend an institutional subscription by completing the Library Recommendation Form below and sending it to your librarian today.

Alternatively, why not use the online Library Recommendation Form for Oxford Journals?²

Go to www.oxfordjournals.org/help/library_recommendation, fill in your details, press “submit”, and the form will automatically be forwarded to your librarian.

LIBRARY RECOMMENDATION FORM

Dear Librarian/Library Acquisition Committee,

I would like to recommend a subscription to:

[Please insert journal name]

for the following reasons:

[Please include your recommendation in your next serials review meeting]

Name: __________________________ Position: __________________________

Department: __________________________ Signature: __________________________

² See www.oxfordjournals.org/help/library_recommendation for full terms and conditions.
Subscriptions: A subscription to Cerebral Cortex comprises 12 issues. All prices include postage. Advance Access contains papers that have reached a corrected proof state, but have not yet been included within an issue. Advance Access is updated daily.

Annual Subscription Rate (Volume 19, 12 issues, 2009)

Institutional
Print edition and site-wide online access: £1117/$2234/€1676
Print edition only: £927/$1854/€1391
Site-wide online access only: £927/$1854/€1391

Personal
Print edition and individual online access: £429/$858/€644
Please note: US$ rate applies to US & Canada, EUC applies to Europe, UK & applies to UK and Rest of World.

There may be other subscription rates available; for a complete listing please visit www.oxfordjournals.org/subinfo/.

Full prepayment, in the correct currency, is required for all orders. Orders are regarded as firm and payments are not refundable. Subscriptions are accepted and entered on a complete volume basis. Claims cannot be considered more than four months after publication or date of order, whichever is later. All subscription in Canada are subject to GST. Subscriptions in the US may be subject to European VAT. If registered, please supply details to avoid unnecessary charges. For subscriptions that include online versions, a proportion of the subscription price may be subject to UK VAT. Personal rate subscriptions are only available if payment is made by personal cheque or credit card and delivery is to a private address.

The current year and two previous years’ issues are available from Oxford University Press. Previous volumes can be obtained online at http://www.periodicals.com/oxford.html or from the Periodicals Service Company, 11 Main Street, Germantown, NY 12526, USA. Email: psc@periodicals.com. Tel: +1 (518) 537 4700. Fax: +1 (518) 537 5899.

Indexing: The journal is indexed in Current Contents/Life Sciences, BIOSIS, CABS (Current Awareness in Biological Sciences), Cambridge Scientific Abstracts: Neurosciences, Index Medicus, MEDLINE, Neuroscience Citation Index, Psychological Abstracts, PsycINFO database, Research Alert, Reference Update, and SciSearch.

The journal is printed on acid-free paper that meets the minimum requirements on ANSI Standard Z39.48-1984 (Permanence of Paper), beginning with Volume 1, Number 1.

Cover Picture: Large portions of the human cerebellum in the lateral and posterior hemispheres are functionally connected with distinct regions in prefrontal cortex, while the anterior cerebellum is preferentially correlated with primary motor cortex. Spontaneous BOLD fluctuations measured during passive task states are constrained by known anatomical projections and can reflect polysynaptic connectivity; for these reasons functional connectivity MRI is a powerful method for mapping the topography of human cerebro-cerebellar circuits. See Krienen and Buckner. 2009. Segregated fronto-cerebellar circuits revealed by intrinsic functional connectivity. Cereb Cortex 19(10): 2498-2510.

Instructions for Authors: Full instructions for manuscript preparation and submission can be found at: http://www.oxfordjournals.org/jnls/list/cercor/for_authors/.
